

**Mount Vernon Spyglass**  
Potomac River, Virginia, USA

During a search for George Washington's maritime landscape and remnants of the miniature ship *Federalist*, over 206nm of survey lanes were undertaken to fully cover the bottom of the Potomac River. This is the target area identified where the "Federalist" ship was before sinking during George Washington's Hurricane of 1788.

Sonar type: Klein 3900  
sidescan sonar
