

**FOR IMMEDIATE RELEASE**

**Mountain View - March 2018**

### **Chesapeake Technology Offers New SonarWiz License Options**

Chesapeake Technology is pleased to announce the immediate availability of two new modules to provide more flexible workflow solutions. Users now have the option to buy SonarWiz Multibeam and SonarWiz Magnetometer as standalone licenses. Both module types will be available for post-processing only, or as data collection and post-processing bundles.

John Gann, VP of Software Development, said “these new modules effectively give users both a lower priced entry point and an upgrade path as their needs change over time.” Single Beam Post-processing may be added to our Multibeam license for \$995 to provide a complete Bathymetry processing solution.

These modules will continue to be available as add-ons to existing licenses, and in bundles with Side Scan and Sub-bottom data collection or post processing. Contact us today for more details +1(650) 967-2045 or [sales@chesapeaketech.com](mailto:sales@chesapeaketech.com).

**Chesapeake Technology, Inc.** is a privately held company based in Mountain View CA. SonarWiz software is used by hundreds of clients worldwide, including NOAA, USGS, Fugro, Oceaneering, leading academic institutions, and many of the world’s navies.
