

**FOR IMMEDIATE RELEASE**

## **SonarWiz Successful December Training Events Worldwide**

Chesapeake Technology Inc (CTI) held its traditional year end training event and added exhibitors and demos to the show. It was held December 10-12, 2019 at the Hilton Inn Express in historic downtown Savannah, Georgia. The event was well attended, and participants were pleased with the quality of SonarWiz 7.5 training provided, and with the many boat demonstrations and one on one meetings with CTI staff.

Harold Orlinsky, General Manager, said "Each day was filled with learning the new features of SonarWiz. The evening events gave us a chance to relax and have a conversation over a beer. The group was great and I'm looking forward to doing a similar event next year."

In a first for CTI, fourteen manufacturers were invited, giving attendees an opportunity to see the latest equipment and newest technology. Exhibitors included Applanix, EdgeTech, ECHO81, Falmouth Scientific, Innomar, Klein Marine Systems, Kongsberg GeoAcoustics, Kongsberg Mesotech, NORBIT, PingDSP, R2Sonic, SBG Systems, SeaRobotics, Survey Equipment Services and The Hydrographic Society of America.

Dave Maddock, CTO, added "The event was a great opportunity to get to know the SonarWiz community, see the software in action on the demo boats, and learn how folks are using our products to solve problems. The engineering team and I came home with lots of great feedback to help make SonarWiz even better."

Meanwhile in Southern Brazil, Luiz Antonio Pereira de Souza with the Institute for Technological Research in Sao Paolo, conducted a 5 day SonarWiz training. This included 3 days of surveys collecting data with a Klein 3000 system, as well as 2 classroom days of processing and interpretation. The comprehensive training was a great success and well attended.

Chesapeake Technology, Inc. is a privately held company based in Mountain View CA. SonarWiz software is used by hundreds of clients worldwide, including NOAA, USGS, Fugro, Oceaneering, leading academic institutions, and many of the world's navies.
